Your Input is Important

The National Environmental Policy Act (NEPA) process stresses the importance of public involvement during the development of an EIS. The public is encouraged to comment on the Proposed Action, alternatives, and potential environmental impacts as presented in the Draft EIS. Your participation will help the DOE make more informed decisions about the Proposed Action.

- Please ask questions. DOE representatives and other experts are here to talk to you and to listen.
- Please provide comments. Your comments will be incorporated into the Final EIS and all comments will be given equal consideration.
- DOE will not proceed with any action until the NEPA process is complete.
